**Subject:** Pine Water Company and the K2 drilling site

Dear Commissioners,

I recently attended a meeting in Pine, Az regarding Pine Water Company and the K2 drilling site.

I have owned property in Pine, Az for over 30 years. Water has always been a problem, but eleven years ago a water board was established and I thought the water problem would be solved. With the establishment of this board, they could search the national forest for water. But the water problems still remain. The previous boards have done nothing to solve the town's water problems.

The current water board is the only board that I know of that has:

- \* established a working relationship with the existing water company
- \* sought out and hopefully located a deep well sight
- \* is actively seeking other deep well sights

\*I support the drilling of the K2 well.\* We need to move forward in our search for water and this is the best start I have seen in eleven years.

Sincerely,

Lana Baker
